

VINTAGEis5

COMFORTABLY ELEGANT

Job quality has a lot to do with a comfortable pleasant environment and feeling at ease in an aesthetically pleasing setting. In turn, our working environment has a lot to do with the quality of our own work. And one of the most important furniture items in a working space is without doubt the office chair.

With more than fifty years experience making chairs for the workplace, the German company Interstuhl has now developed a new line of office chairs where design and ergonomics are equally important - VINTAGEis5 series. Avant-garde comfort-enhancing features like the Company's "Smart Motion" technology, the "Bionic Effect" mesh back support and the "Auto Flow" armrests promoting movement and correct posture, are all included in the new range. Equal attention has also been given to product design and aesthetics. The engineering and technological excellence allowing the special forms, materials and ergonomic solutions have not encroached on the aesthetic appeal of this world-renowned chair. Hugely comfortable from the very first moment, the VINTAGEis5's configuration makes its use "intuitive" and easily adaptable to personal needs. Its sleek lines make it a refined object in any setting. Elegant and manufactured to the highest standards, its discreet style allows it to fit easily into any workplace interior décor, its unmistakable style enhancing any environment.
